Documentation

Project objective:

As a developer, build Authentication Provider in Spring Security.

Background of the problem statement:

You have been assigned a task by the team to add more flexibility rather than using the standard scenario in building Spring Security.

You must use the following:

● Node.js
● Jenkins
● Angular Application

Following requirements should be met:

● A few of the source code should be tracked on GitHub repositories. You need to document the tracked files which are ignored during the final push to the GitHub repository.
● The submission of your GitHub repository link is mandatory. In order to track your task, you need to share the link of the repository in the document.
● The step-by-step process involved in completing this task should be documented.
